Not a study, but computer systems designed to make evidence-based, clinical decision for a patient

Synopses or summaries that are created, based on evidence, and appraised

Primary study that is randomized and has a control.

Primary studies that are observational with no control

No humans

Animal/Cell Cultures

Background Information/Expert Opinion

Not studies, no design

Primary studies that are observational with control

Secondary studies

Primary studies that are observational with control

Randomized Control Trial (RCT)

Studies with Controls (Cohort Studies - prospective; Case Control Studies - retrospective)

Studies without Controls (Case Study; Case series)

Meta-analysis and Systematic Review

Critically Appraised Topics (CATs) /Summaries

Practice Guidelines

Computer Systems
